# README

## Web Development Projects

---

## Student Details

**Name:** Kavya Sri

**Roll No:** 26000188

**Branch:** CSE

**Section:** CSE-3

## Projects Overview

### 1. Personal Portfolio Website

A personal portfolio website introducing the student and showcasing education, skills, projects, interests, and contact information.

**Technologies:** HTML, CSS, Python (as listed in the portfolio skills section).

### 2. College Information and Admissions Website

A college website providing information about the institution, departments, courses offered, faculty profiles, campus facilities, college events, and admission enquiries.

#### Features

- College introduction, vision, and mission
- Department and course details
- Faculty profiles
- Campus facilities and events
- Admission procedure and enquiry form
- College contact information

### 3. LearnOnline – Online Learning Platform

An online learning website that presents programming courses and allows students to explore course information and use an enrollment form.

#### Features

- Home page and navigation
- Programming courses, including JavaScript and Python
- Instructor and course details
- Course duration and pricing
- Learning objectives and progress indicators
- Student enrollment form
- Contact information

## Technologies Used

- HTML
- CSS
- Basic web page forms and navigation

## Purpose

These projects demonstrate the design and development of web pages for a personal portfolio, college information system, and online learning platform.
