# CONSOLIDATED WEB PROJECTS REPORT

Screenshot-based report of three HTML website projects

## Projects included

**1. Personal Portfolio Website** — introduces the student, education, interests, skills, project, and contact details.

**2. College Information and Admissions Website** — presents college information, departments, courses, faculty, facilities, events, admissions steps, enquiry form, and contact information.

**3. LearnOnline Platform** — showcases online courses, instructor and course details, learning objectives, progress indicators, enrollment form, and contact information.

## Purpose

This report consolidates the supplied browser screenshots into one PDF document. Each screenshot is included as visual evidence of the relevant website page. Descriptions are based only on the visible content in the screenshots.

# Project Summary

**Personal Portfolio:** The page uses a purple-to-blue header and card-based sections. Visible content includes an introduction, education history, skills (HTML, CSS, Python), a personal portfolio project, and contact details.

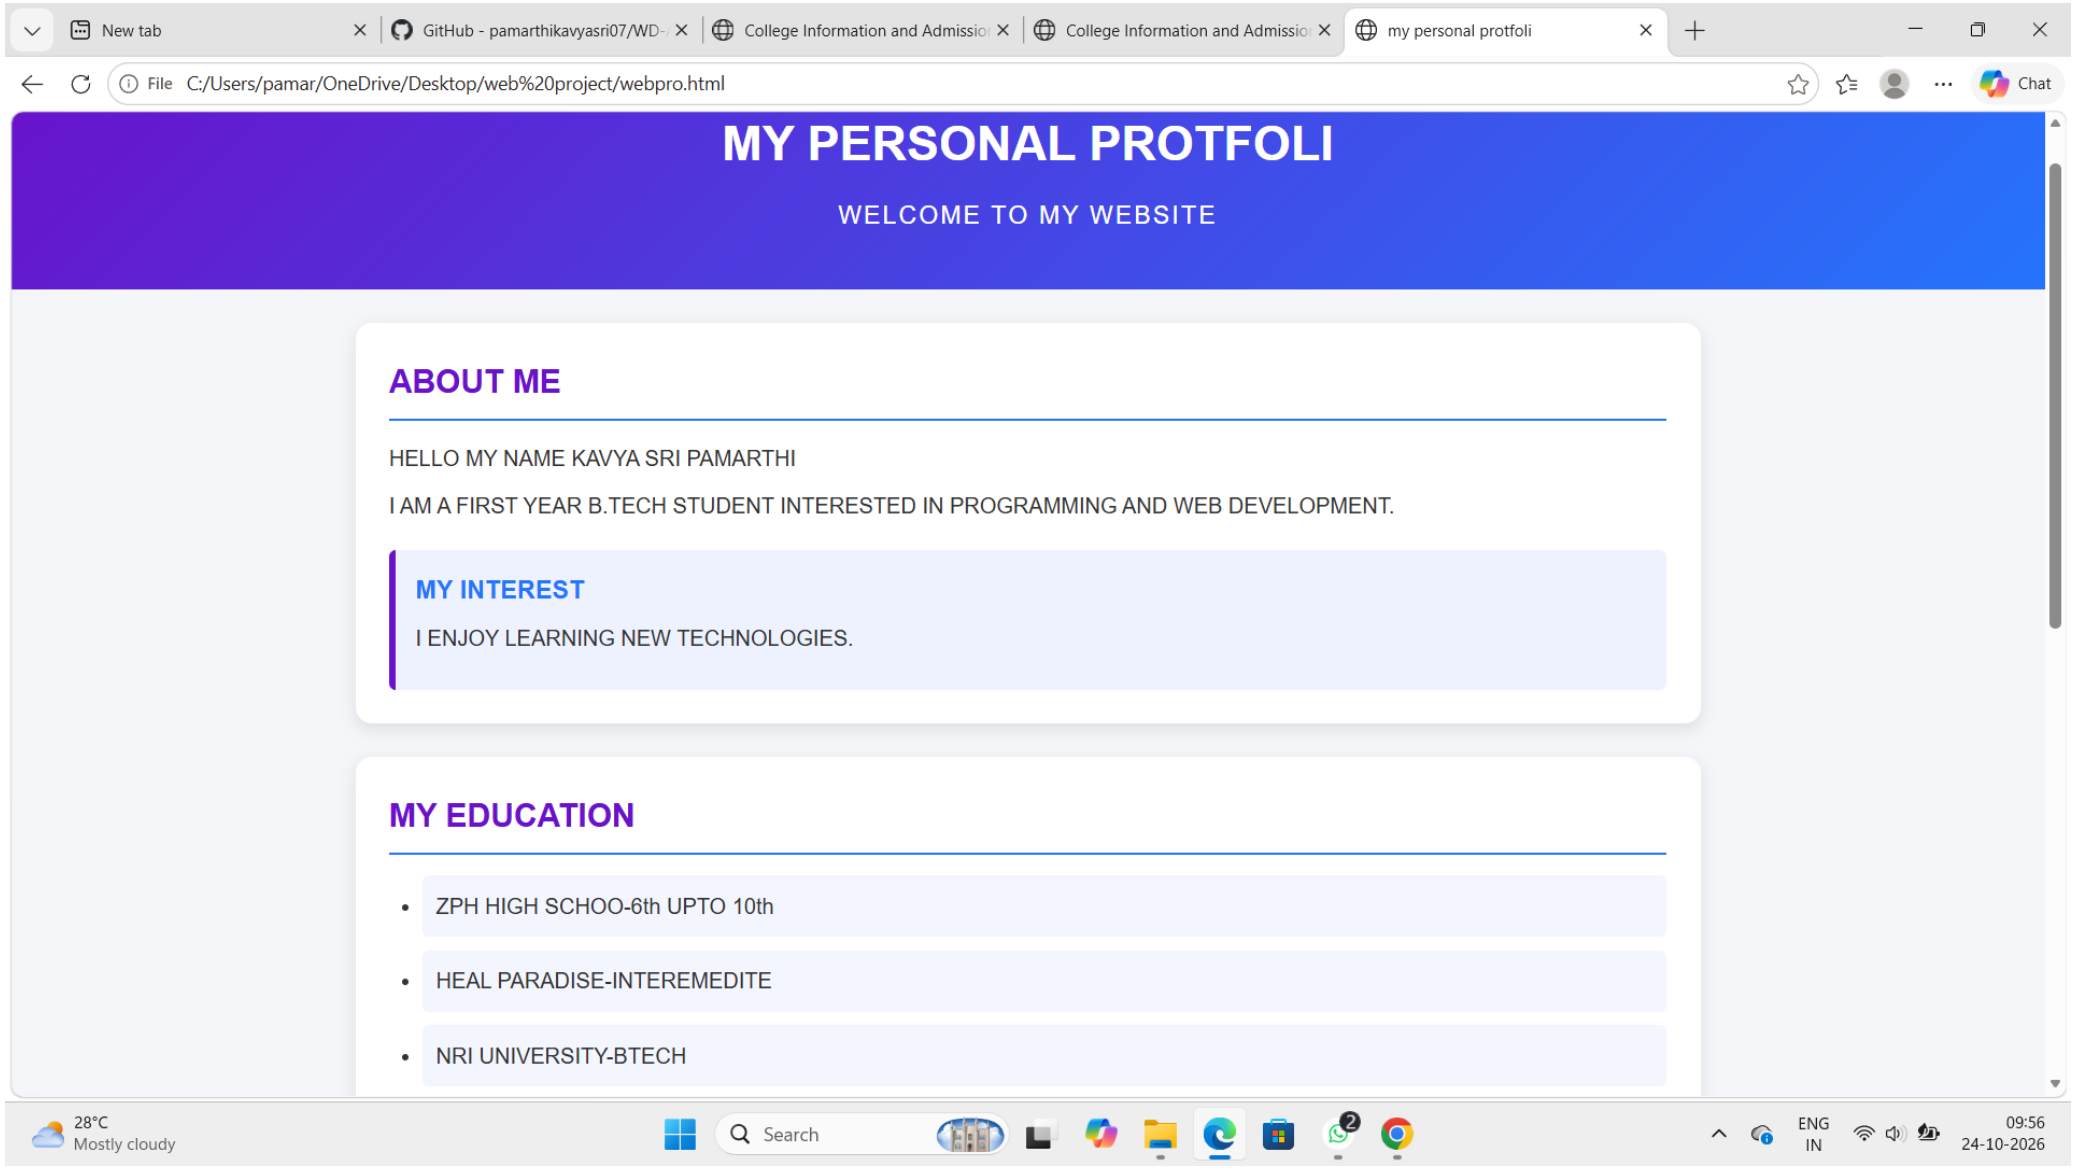

**College Information Website:** The page uses a navy-blue and light-blue theme with orange section dividers. It includes college overview, vision and mission, six departments, a courses table, faculty profiles, campus facilities, event listings, admission procedure, an enquiry form, and contact information.

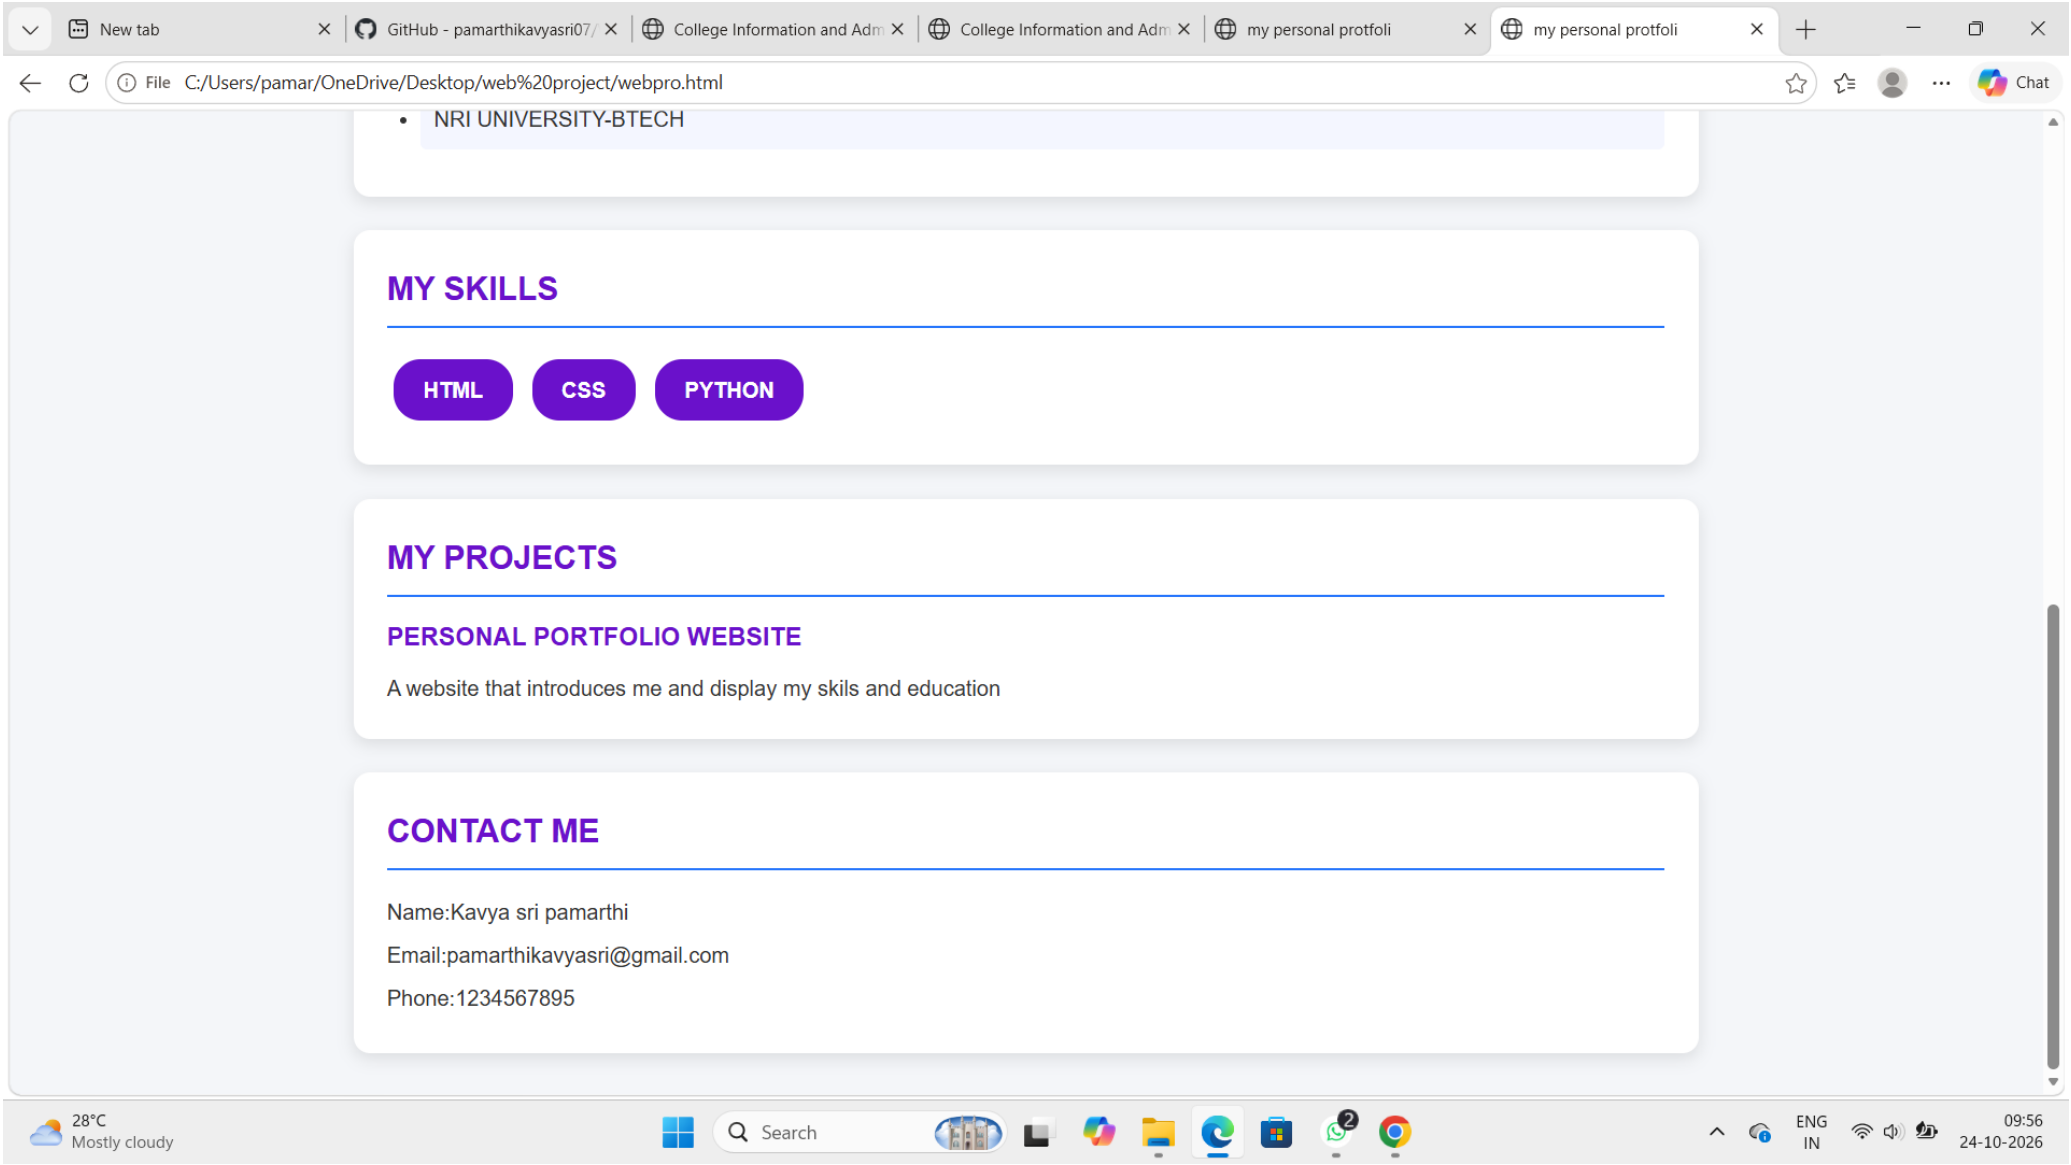

**LearnOnline Platform:** The page uses a navy-blue header and light-blue content areas. It includes navigation links, JavaScript and Python course information, instructors, durations, prices, learning objectives, progress percentages, enrollment controls, and a student enrollment form.

**Note:** The college name, course details, contact information, and other content are reproduced as visible in the supplied screenshots; this report does not independently verify them.
